

### Redefine measurement

The AAB is a complete and versatile achievement assessment developed using academic standards set by the National Council of Teachers of Mathematics, the National Council of Teachers of English, Common Core, and Reading First.

#### The AAB is quick and efficient

- The AAB assesses four areas of achievement (basic reading, spelling, mathematical calculation, and reading comprehension) in one easy-to-use response booklet.
- Reading subtests combine to provide a Reading Composite Score, which provides more data to help you understand an individual's reading skills.
- Includes reliable change scores and ability-achievement discrepancies with the RIAS-2. When used together, the AAB and the RIAS-2 offer a valid and efficient way to thoroughly assess intelligence and academic achievement.
- FREE scoring for the Standard Form is available on PARiConnect, our online assessment platform.

#### AAB Comprehensive Form

- Assesses performance in the main areas of achievement as defined by the Individuals with Disabilities Education Act (IDEA): oral expression, listening comprehension, written comprehension, basic reading skill, reading fluency skills,

reading comprehension, mathematics calculation, and mathematics problem solving.

- A skills analysis offers a wealth of data with which to make interpretations and recommendations.

#### AAB Screening Form

- Includes four subtests (letter/word reading, spelling, mathematical calculation, and written composition [optional]) in one easy-to-use response form.
- Appropriate for evaluating fundamental academic skills when working with those referred for learning or vocational concerns.
