

Adolescent Psychopathology Scale-Short Form™

William M. Reynolds, PhD

Generated by PARiConnect

Clinical Score Report

Client name: Sample Client

Client ID: PAR Sample

Test date: 09/15/2023

Date of birth: 10/31/2005

Age: 17

Grade: 12th grade

Prepared for: Dr Jones

Ethnicity: Native American

Gender: Female

School/Agency: PHS

This report is confidential and is intended for use by qualified professionals who have sufficient knowledge of psychometric testing in general and of the APS in particular. This report should <u>not</u> be released to the client being assessed. This report has been developed for professionals with appropriate training and not for parents.

Use of the APS-SF Clinical Score Report

The summary information presented in this report is based on the adolescent's responses to the 115-item APS-SF. The *T* scores for each of the APS-SF scales presented below are standard scores with a mean of 50 and a standard deviation of 10 points. **The** *T* **scores are based on the APS-SF standardization sample of 1,076 adolescents, ages 15 to 19 years**. *T* scores based on other comparison samples (e.g., by gender, gender by age group, and total standardization sample) may be found in the APS-SF Professional Manual. Procedures related to interpretation of blank items, the use of cutoff scores, and the use of normative tables are also described in the APS-SF Professional Manual. The following steps are recommended for interpreting APS-SF scores.

Steps in the Interpretation of APS-SF Scales and Scores

- 1. General protocol check.
- 2. Examination of Validity Scales.
- 3. Examination of Clinical Scales.
- 4. Examination of Critical Items.
- 5. Examination of APS-SF Scale Profile.

Summary of APS-SF Scale Elevations

A basic component of APS-SF scale interpretation is the examination of scales that are elevated to clinically relevant levels of symptomatology. The primary cutoff score for most of the APS-SF scales, except those with very low base rates of occurrence, is 1 ½ standard deviations above the normative mean, a raw score that corresponds to a T score of 65. Using the APS-SF standardization sample as the reference base, T scores from 65 to 69 represent a mild clinical symptom range. T scores from 70 to 79 may be considered to represent a moderate clinical symptom range and T scores of 80 and above represent a severe clinical symptom range. Note that elevated APS-SF scores are not diagnostic of DSM-IV disorders. Clinical judgment and knowledge of the psychometric properties of each APS-SF scale should guide the clinical application of cutoff scores. In addition to elevated APS-SF scales, interpretation should also include referral information, other test data, behavioral observations, and reports from significant others.

Subclinical Symptom Range (60*T* to 64*T*)

No scores in this range.

Mild Clinical Symptom Range (65T to 69T)

Inconsistency (CNR; 69T)

Moderate Clinical Symptom Range (70*T* to 79*T*)

Conduct Disorder (*CND*; 78*T*) Major Depression (*DEP*; 71*T*)

Severe Clinical Symptom Range (80*T* and above)

Substance Abuse Disorder (*SUB*; 109*T*) Suicide (*SUI*; 85*T*)

APS-SF Score Summary Table

	Raw		Percent
APS-SF scale	score	T score	completed
Clinical scales			
Conduct Disorder (CND)	9	78	100%
Oppositional Defiant Disorder (OPD)	1	36	100%
Substance Abuse Disorder (SUB)	18	109	100%
Anger/Violence Proneness (AVP)	6	52	100%
Academic Problems (ADP)	7	55	100%
Generalized Anxiety Disorder (GAD)	10	58	100%
Posttraumatic Stress Disorder (PTS)	5	49	100%
Major Depression (<i>DEP</i>)	18	71	100%
Eating Disturbance (EAT)	2	49	100%
Suicide (SUI)	9	85	100%
Self-Concept (SCP)	6	54	100%
Interpersonal Problems (IPP)	8	57	100%
Validity scales			
Defensiveness (DEF)	1	48	100%
Inconsistency (CNR)	2	69	100%

Note. "---" indicates a scale is invalid due to an excessive number of missing item responses.

^{*}Prorated raw score.

Profile of APS-SF Scales

Note. "---" indicates a scale that is invalid due to an excessive number of missing items.

Critical Items Summary Form

Item		
number	Response	Critical Item
3.	F	I broke into a house, car, or building.
4.	F	I ran away from home two or more times.
6.	T **	I hurt animals.
7.	F	[Redacted for Sample Report]

Note. APS-SF Critical Items should be interpreted cautiously. Use of the Critical Items is one level of APS-SF scale interpretation. See the APS-SF Professional Manual for additional guidelines for the use of the Critical Items. Asterisks (**) denote Critical Items endorsed in the keyed direction or left blank.

Response Legend. T = True; F = False; N = Never or almost never; ST = Sometimes; A = Nearly all the time; 1-2 = Once or twice a week; 3+ = Three or more times a week; E = Nearly every day; CM = Couple of times a month; 1W = Once a week; CW = Couple of times a week; ED = Nearly every day; ? = Item left blank.
