From struggling & disorganized...

To Focused & On Task

The gold-standard rating form for executive function testing.

The BRIEF2 provides the information you need to help children and adolescents with executive function difficulties. The assessment digs deeper than similar measures and pinpoints exactly where and why children struggle, so that therapists and schools can implement informed interventions and accommodation recommendations.

BRIEF®2

PURPOSE
Assesses impairment of executive function

AGE 5-18 years

FORMAT Paper and pencil; online administration & scoring via PARiConnect

TIME 10 minutes for full assessment; 5 minutes for screening form; 15 minutes to score

QUAL B (full form) or S (screening form)

INTERVENTIONS HANDOUTS
Written in easy-to-understand language presented in colorful handouts, the BRIEF2 Interventions Handouts help parents, teachers, and students understand the examinee’s executive functioning strengths & weaknesses.

• **Fast:** Administer in just 10 minutes—the screening forms take only 5 minutes!

• **Robust and comprehensive:** BRIEF2 features high sensitivity to executive function problems in key clinical groups such as ADHD and ASD. The Parent and Self-Report forms are also available in Spanish.

• **Thorough and informative:** BRIEF2 has three index scores that help pinpoint specific executive function issues: Behavior regulation, Emotion regulation, and Cognitive regulation.

• **Accurate and reliable:**
  - The Score Report includes validity results, a clinical scale, index, and composite T scores.
  - The Interpretive Report includes all information on the score report PLUS interpretive text for BRIEF2 clinical scale, index, and composite scores and validity indicators.
  - The Self-Report provides details about the level of awareness and perceptions of the examinee’s own executive functioning.
  - Reliable change statistics make it easy to measure the significance of change in scores over time.

Included in more than 1,000 peer-reviewed studies across six continents.
