"Is that you?!"

A bottlenose dolphin can recognize a former member of its pod after 20 years *just* from its whistle.

The importance of verbal memory can't be overstated, and early detection of possible difficulties is crucial. Use the memory test specifically developed for children, adolescents, and young adults: the ChAMP.

PAR TRAINING PORTAL

A comprehensive memory assessment that offers simplicity and value

- Simple to use yet comprehensive: Covers core verbal, visual, immediate, and delayed memory domains with only four subtests.
- Features colorful and engaging stimuli that help children focus.
- A single form contains all administration instructions, and only one stimulus book is needed.
- Includes two verbal memory and two visual memory subtests. These combine to yield an overall score—the Total Memory Index.
- Standardized using a large normative sample of more than 1,200 participants in 30 states representative of the 2012 U.S. Census.
- Validated on a large clinical sample of more than 200 individuals with learning disabilities, ADHD, ASD, brain injury, and intellectual disability.
- The Screening Index, comprising one verbal and one visual subtest, is useful for brief memory screening.
- The In-Person e-Stimulus Book is a convenient, more hygienic alternative to paper administration that allows you to administer the ChAMP face-to-face via tablet.
