

Iowa Gambling Task™ Version 2

Score Report

by Antoine Bechara, PhD, and PAR Staff

Generated by

Client name: Sample Client

Client ID: PAR Sample

Date of Test: 09/26/2023

Date of Birth: 10/31/2005

Age: 17

Sex: Female

Grade/Years of Education: 12th Grade

Race/Ethnicity: Caucasian

Test Description: Sample Description

Use of this report requires a thorough understanding of the Iowa Gambling Task™, Version 2 (IGT™2), its interpretation, and clinical applications as presented in the IGT2 Professional Manual (Bechara, 2016). This report is intended for use by qualified professionals and is not to be shared with the examinee or any other unqualified persons.

This report reflects a standard computerized administration (i.e., 100 trials) of the IGT2. The normative scores that appear in this report were developed by Bechara (2016) and were based on a standardized 100-trial computerized administration. Users should refer to the IGT2 Professional Manual (Bechara, 2016) for the clinical interpretation of this score report. Clinical interpretation of the IGT2 requires professional training and expertise in clinical psychology and/or neuropsychology. The utility and validity of the IGT2 as a clinical measure is directly related to the professional's background knowledge, and, in particular, familiarity with the information contained in the IGT2 Professional Manual.

IGT2 results should be interpreted within the context of a larger clinical assessment battery and relevant clinical and historical information about this client. Additionally, use of IGT2 scores for clinical or diagnostic decisions should not be attempted without a thorough understanding of brain-behavior relationships and the medical and psychological factors that affect them. It is important to note that poor IGT2 scores do not automatically imply prefrontal cortex or, more specifically, orbitofrontal/ventromedial prefrontal cortex damage or dysfunction.

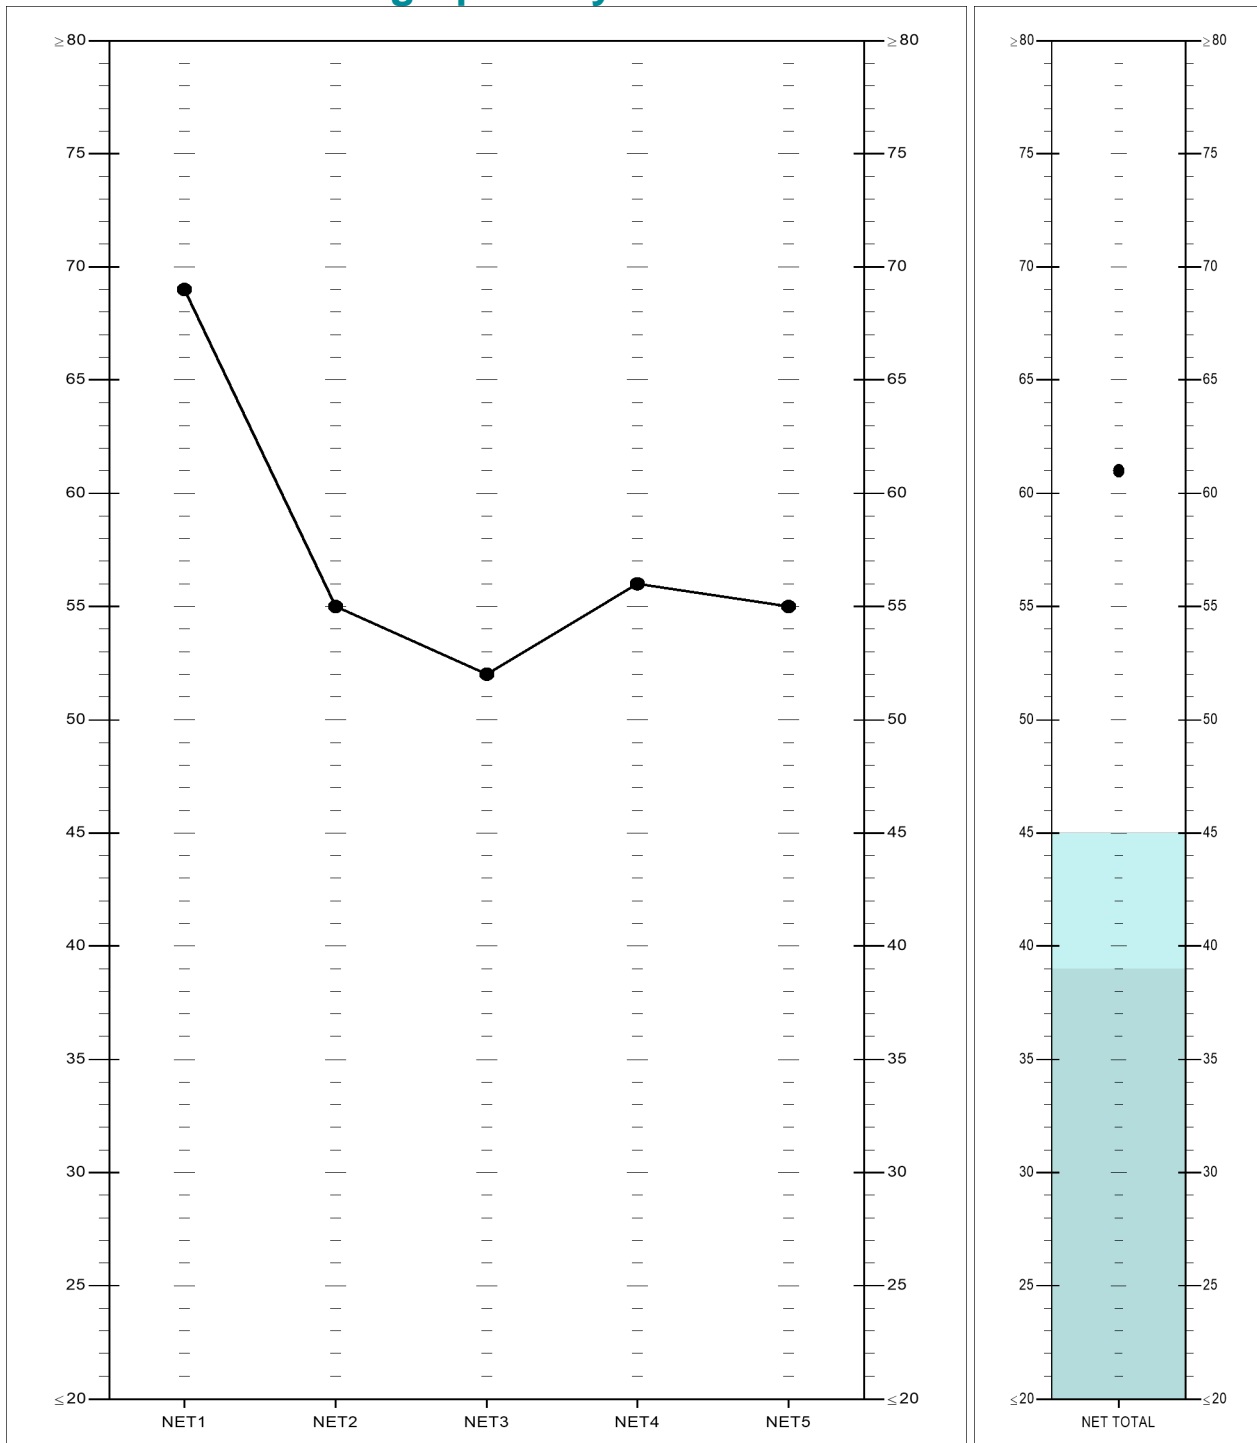

IGT2 Score Summary Table

Score	Raw score	Demographically corrected	
		T score	%ile
NET TOTAL	32	61	86
NET 1	8	69	97
