**Purpose** Measures everyday memory, learning, and executive aspects of memory

**Age** 5-21 years

**Format** Paper and pencil; administer and score online via PARiConnect

**Time** 5 minutes to administer

**Qual** B

## Quickly evaluate everyday memory in youth

- The first and only nationally standardized rating scale specifically designed to measure everyday memory in children, adolescents, and young adults.
- Provides multiple perspectives on memory capacity from different raters including parent and teacher (for ages 5-19 years) and self (for ages 9-21 years).
- Integrates easily into busy clinical settings, helping to identify children in need of specialized referral in cognitive, psychoeducational, and neuropsychological assessments.
- Includes an overall score, the Everyday Memory Index (EMI), as well as scales that tap learning, daily memory, and executive/working memory, and three validity scales (Implausibility, Inconsistency, and Maximizing).
- Allows clinicians to differentiate between problems caused by memory failures versus failures due to problems with working memory and attention, a common referral question.

	MEMRY	ChAMP	MVP
<b>What it does</b>	Assesses everyday memory in youth	Assesses visual and verbal memory in youth	Assesses performance validity in youth
<b>When to use it</b>	To obtain multiple perspectives on everyday memory, learning, and executive aspects of memory, including working memory	To conduct an examiner-administered in-depth memory evaluation or memory screening in a controlled testing environment	To detect whether an examinee is providing valid test scores
<b>How it helps clinicians</b>	Offers an inexpensive, quick, and easy measure to integrate into busy clinical settings as a screening or as a core component of a comprehensive assessment	Provides an instrument that is brief, is easy to learn and master, is captivating to distractible or very young examinees, and includes recommendations for school and home	Improves testing outcome confidence by accurately and rapidly assessing whether a child's scores are a valid estimate of his or her ability
