

Tired of using multiple tests that aren't conormed?

The NAB is a comprehensive instrument that offers the combined strengths of both a flexible and fixed neuropsychological battery. Since all 33 individual tests are conormed, you can spend more time on treatment and less on interpretation.

Purpose Assesses a wide range of cognitive skills and functions

Age 18–97 years

Format Paper and pencil; Online scoring via PARiConnect

Time 3 hours and 40 minutes to administer all five modules

Qual C

Give yourself the advantage of the NAB

A flexible yet comprehensive neuropsychological battery

The NAB was designed to be used in a variety of situations including outpatient examination, research studies, forensic examinations, and many other clinical and research applications.

The NAB is also flexible when it comes to purchasing. You can buy the entire battery, any of the six modules, and certain tests can be purchased individually. The NAB lets you decide exactly what to purchase.

NAB stimulus books are available in digital format—so you can administer face-to-face via tablet.

NAB modules target a breadth of constructs

Focus on a particular aspect of cognitive skills

The full NAB kit features six modules (five domain-specific plus a screening module), giving you flexibility in administering only what you choose. Plus, each of the modules takes less than an hour to administer.

NAB Screening Module

Administration: 45 minutes

This module streamlines the assessment process by providing scores that quickly let you know whether further assessment should be conducted. It also helps generate initial hypotheses regarding differential diagnosis and treatment recommendations.

NAB Attention Module

Administration: 45 minutes

This module provides a marker of an individual's attentional capacity, working memory, psychomotor speed, selective attention, divided attention, and information processing speed.

NAB Language Module

Administration: 35 minutes

This module provides a marker of the severity of aphasia and related disorders of language production, comprehension, and word-finding.

NAB Memory Module

Administration: 45 minutes

This module provides a marker of an individual's verbal explicit learning, visual explicit learning, verbal delayed free recall, visual delayed recognition memory, and verbal explicit learning and recognition of information likely to be encountered in day-to-day living.

NAB Spatial Module

Administration: 25 minutes

This module provides a marker of the examinee's visuospatial skills, attention to visual detail, visuoconstruction, right-left orientation, topographical orientation, and visual scanning.

NAB Executive Functions Module

Administration: 30 minutes

This module provides a marker of planning, engaging with others effectively, problem solving, successfully interacting with the environment to ensure one's needs are met, judgment, conceptualization, cognitive response set, mental flexibility, verbal fluency, and generativity.

Select NAB tests can be purchased separately

Choose the specific instrument you need

Retaining all the features that make the NAB an achievement in neuropsychological testing, each test features detailed record forms to guide you through administration; equivalent, parallel forms that reduce the likelihood of practice effects; quick administration and scoring; and a updated Professional Manual that focuses on that particular test.

NAB Auditory Comprehension Test™

Administration: 10–15 minutes

From the **Language Module**, the NAB Auditory Comprehension Test was designed to be a comprehensive assessment of auditory comprehension.

NAB Design Construction Test™

Administration: 15 minutes

From the **Spatial Module**, the NAB Design Construction Test is a brief timed performance test consisting of eight items, each representing an assembly task.

NAB Categories Test™

Administration: 10–15 minutes

From the **Executive Functions Module**, the NAB Categories Test is a classification and categorization task designed to evaluate concept formation, cognitive response set, mental flexibility, and generativity.

NAB Digits Forward/ Digits Backward Test™

Administration: 10–15 minutes

From the **Attention Module**, the NAB Digits Forward/Digits Backward Test offers a simple and brief assessment of attention for orally presented information, as well as working memory.

NAB Mazes Test™

Administration: 20–25 minutes

From the **Executive Functions Module**, the NAB Mazes Test was designed to avoid both floor and ceiling effects found in existing maze tests.

NAB Orientation Test™

Administration: 10 minutes

From the **Attention Module**, the NAB Orientation Test was designed as a measure of orientation to self, time, place, and situation.

NAB Naming Test™

Administration: 10–15 minutes

From the **Language Module**, the NAB Naming Test is designed to assist in the identification of individuals with deficits in visual confrontation naming skills, most commonly found in patients with aphasia.

NAB Visual Discrimination Test™

Administration: 10–15 minutes

From the **Spatial Module**, the NAB Visual Discrimination Test was developed to assist in the determination of deficits in visuosperceptual and visuospatial skills.

NAB Numbers & Letters Test™

Administration: 15–20 minutes

From the **Attention Module**, the NAB Numbers & Letters Test was designed to identify deficits in attention and inhibition.

NAB Writing Test™

Administration: 5 minutes

From the **Language Module**, the NAB Writing Test represents a measure of narrative writing skills and may assist in the identification of dysgraphia/agrapia.
