## Score Report

Results for: Sample Client

Client ID: PAR Sample

Age: 17

Gender: Female

Test form: R

Test date: 09/21/2023

Normative group: Adolescent Gender Specific

This report is intended for use by qualified professionals only and is not to be shared with the examinee or any other unqualified persons.

## NEO-FFI-3:4FV Data Table

Scale	Raw score	T score	Range
<b>Factors</b>			
(E) Extraversion	27	45	Average
(O) Openness	35	62	High
(A) Agreeableness	36	62	High
(C) Conscientiousness	40	65	High

## Personality Style Graphs

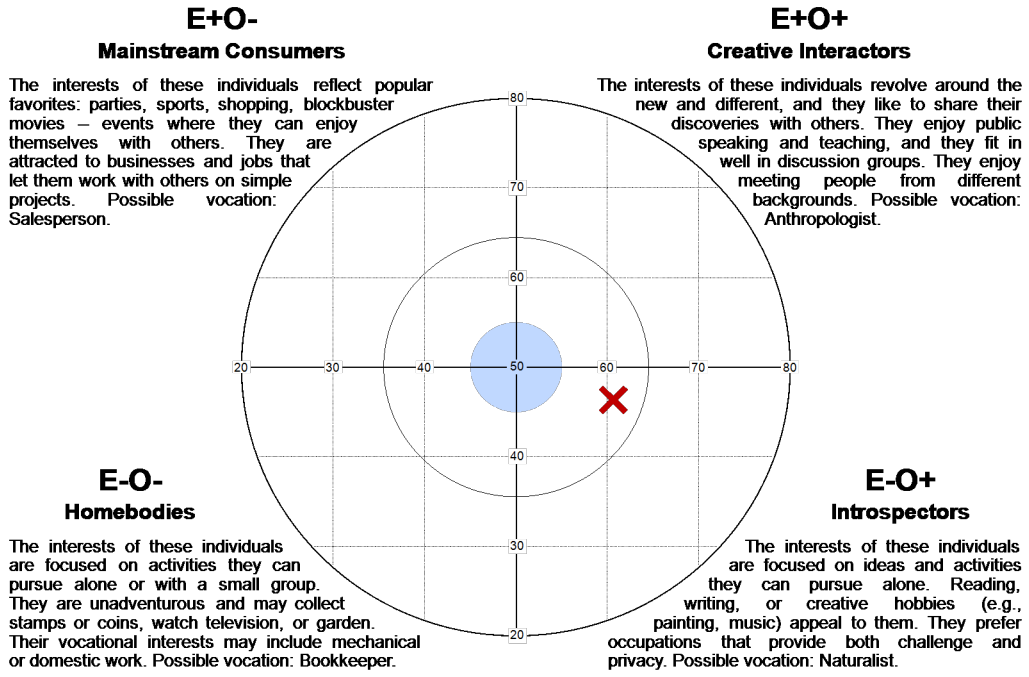

Broad personality factors are pervasive influences on thoughts, feelings, and actions, and combinations of factors provide insight into major aspects of people's lives, defining what can be called personality styles. For example, for many years psychologists have known that interpersonal interactions can be conceptualized in terms of a circular ordering or circumplex, defined by the two axes of Dominance and Love, or by the alternative axes of Extraversion and Agreeableness. These two factors define a Style of Interactions.

The five other pairs of factors also define styles, and all six are represented in NEO Style Graphs. An X is placed on each graph to indicate where the respondent falls; the description of that quadrant applies to the respondent. Descriptions are likely to be most accurate if (1) the X is far from the center; (2) the X is near the diagonal passing through the center of the quadrant; and (3) all the facets in each domain show similar levels. If the X is placed in the central circle, then none of the descriptions is especially relevant. If the X is located near the horizontal or vertical axis, then both quadrants on that side of the circle may be descriptive. If there is marked scatter among the facets in a domain, then interpretation should focus on these facets rather than the domain and its combinations in Style Graphs.

# Personality Style Graphs

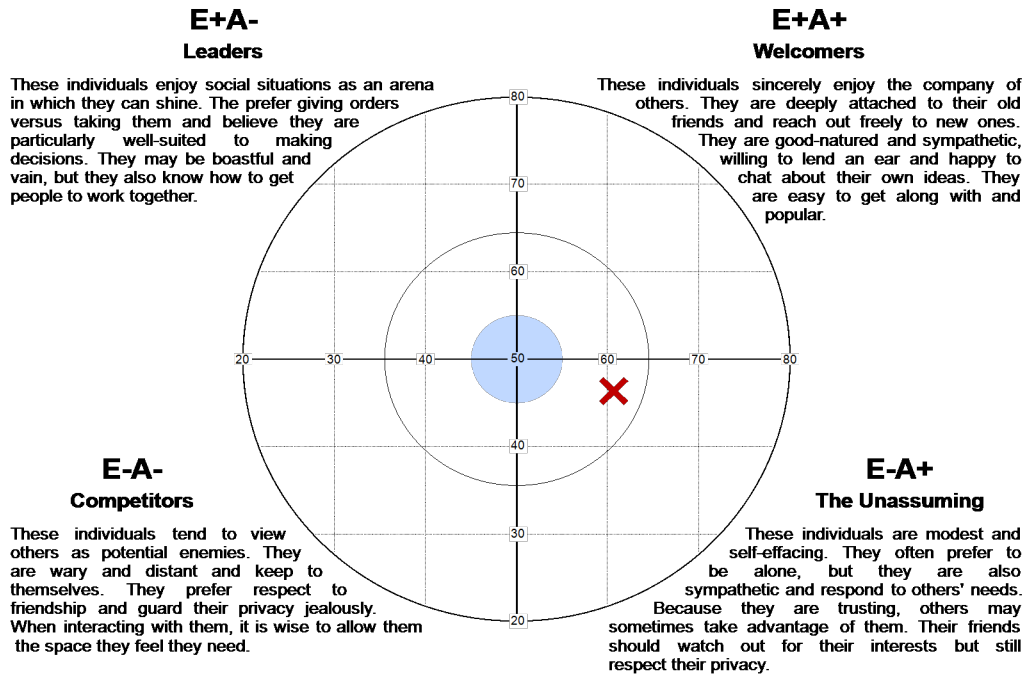

## Style of Interests

Vertical Axis: Extraversion (= 45 T )  
 Horizontal Axis: Openness (= 62 T )

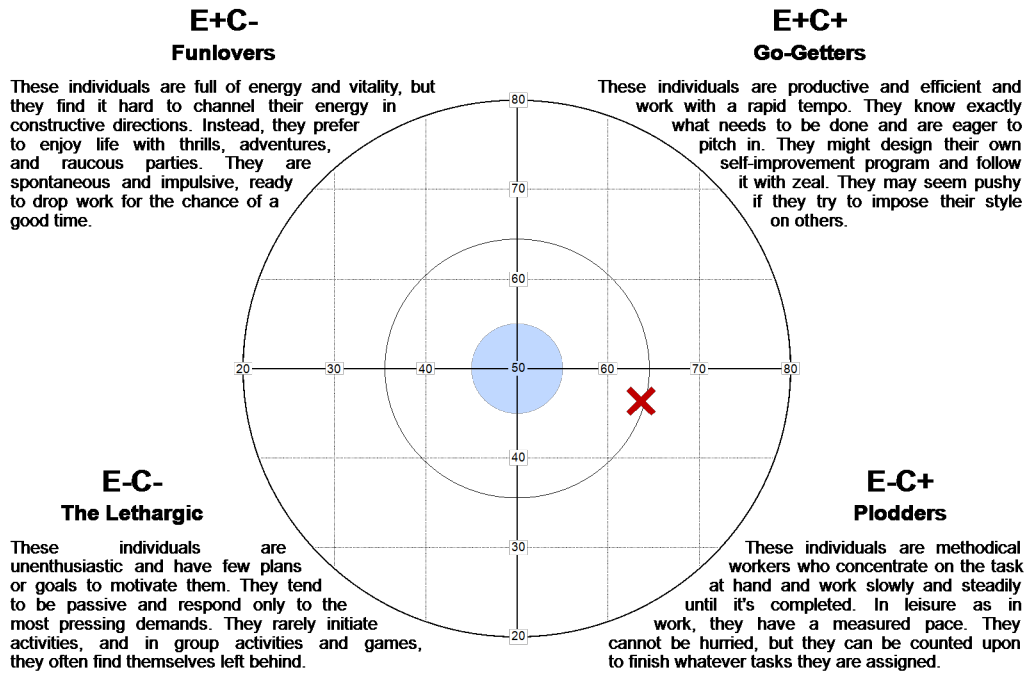

# Style of Interactions

Vertical Axis: Extraversion (= 45 T )  
 Horizontal Axis: Agreeableness (= 62 T )

## Style of Activity

Vertical Axis: Extraversion (= 46 T )  
Horizontal Axis: Conscientiousness (= 66 T )

## Style of Attitudes

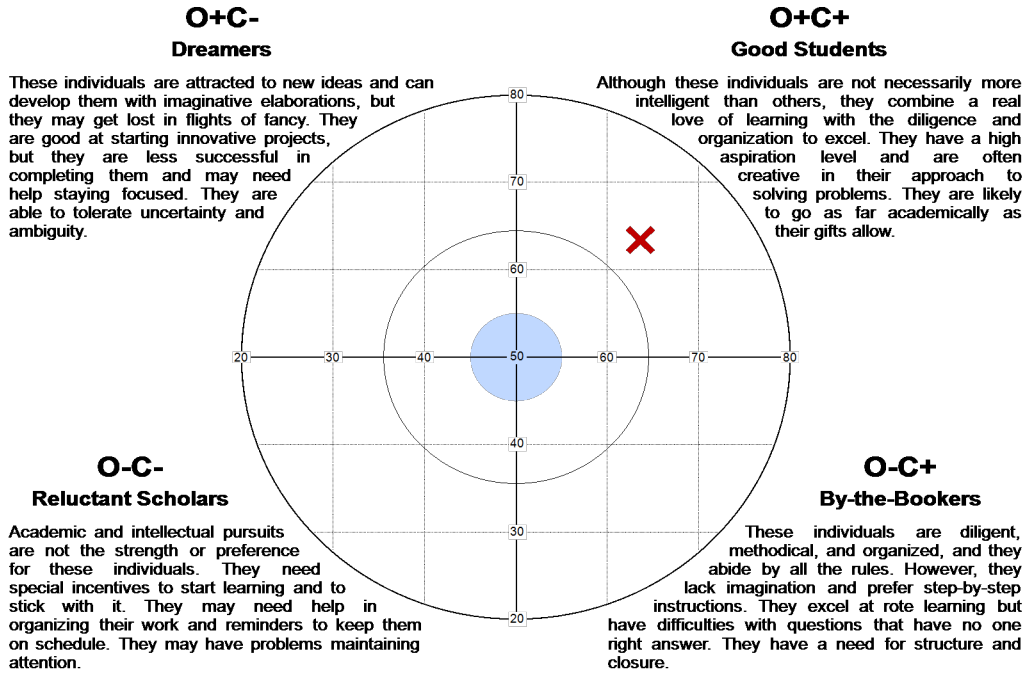

Vertical Axis: Openness (= 62 T )  
Horizontal Axis: Agreeableness (= 62 T )

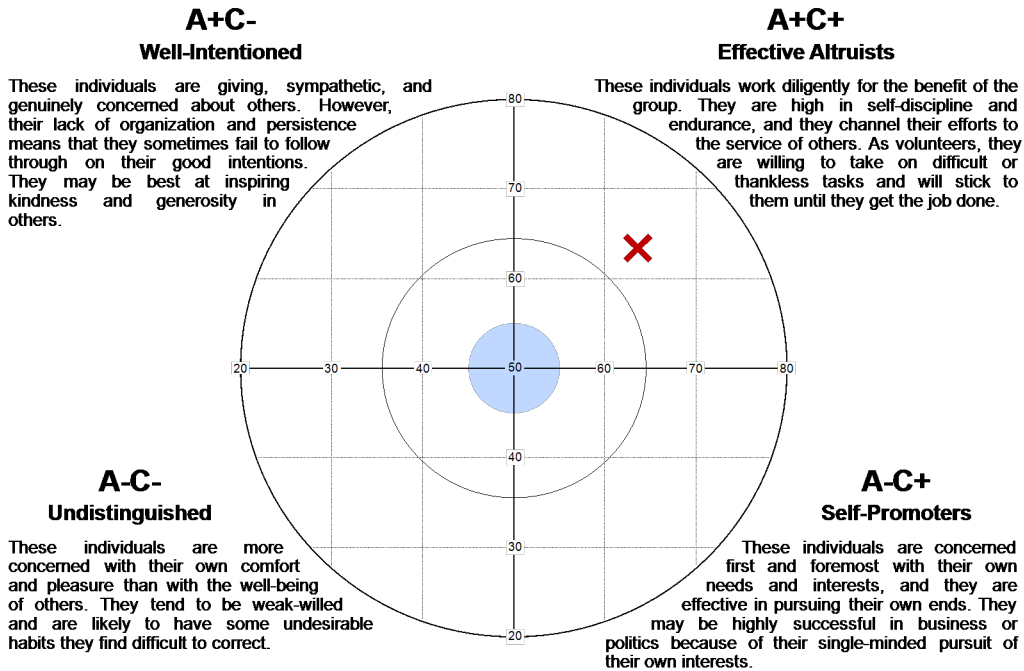

## Style of Learning

Vertical Axis: Openness (= 62 T )  
Horizontal Axis: Conscientiousness (= 65 T )

## Style of Character

Vertical Axis: Agreeableness (= 62 T )  
Horizontal Axis: Conscientiousness (= 65 T )

## NEO-FFI-3:4FV Item Responses

Item	Rsp	Item	Rsp	Item	Rsp	Item	Rsp	Item	Rsp	Item	Rsp
