A comprehensive measure of personality

This objective inventory of adult personality assesses psychopathological syndromes and provides information relevant for clinical diagnosis, treatment planning, and screening for psychopathology.

- All 22 scales are nonoverlapping, promoting high discriminant validity. Scale development was content-driven.
- Administration time is up to 40 minutes shorter than that for similar measures.
- Critical Items Form alerts you to issues that require immediate attention.
- Requires only a fourth-grade reading level.
- A two-part carbonless Answer Sheet provides scores for all 344 items.
- Clinical scales provide critical diagnostic features of 11 important clinical constructs.
- Treatment scales indicate potential complications in treatment. Interpersonal scales provide valuable information regarding the client’s relationships and interactions. Two scales assess pathology.
