One of the most important innovations in personality assessment

The 344 PAI items make up 22 nonoverlapping scales covering the constructs most relevant to a broad-based assessment of mental disorders. Available for administration and scoring on paper or via PARiConnect.

A comprehensive measure of personality

This objective inventory of adult personality assesses psychopathological syndromes and provides information relevant for clinical diagnosis, treatment planning, and screening for psychopathology.

- All 22 scales are nonoverlapping, promoting high discriminant validity. Scale development was content-driven.
- Administration time is up to 40 minutes shorter than that for similar measures.
- Critical Items Form alerts you to issues that require immediate attention.
- Requires only a fourth-grade reading level.
- A two-part carbonless Answer Sheet provides scores for all 344 items.
- Clinical scales provide critical diagnostic features of 11 important clinical constructs.
- Treatment scales indicate potential complications in treatment. Interpersonal scales provide valuable information regarding the client’s relationships and interactions. Two scales assess pathology.

Also Available!

- PAI Software Portfolio (PAI-SP), PAI-SP On-Site Scanning Module, and PAI-SP Professional Report Service
- PAI Law Enforcement, Corrections, and Public Safety Selection Report Module
- PAI Interpretive Report for Correctional Settings (PAI-CS) Module
