Purpose Assesses responsiveness to intervention in children with autism spectrum disorder

Age 1:6–18:5 years

Format Paper and pencil; online administration and scoring via PARiConnect

Time 30–45 minutes for Extended Forms; 20–30 minutes for Standard Forms; 20 minutes to score; 5–10 minutes for Screening Version

Qual B or S

PARiConnect

Make diagnosing and tracking progress easier

- Use to screen, diagnose, or track individuals on the autism spectrum.
- The PDD Behavior Inventory was developed to assess problem behaviors as well as appropriate social, language, and learning and memory skills in individuals ages 1:6 to 18:5 years.
- The PDD Behavior Inventory Screening Version (PDDBI-SV) produces one simple score that measures the presence of inappropriate social behaviors to identify children ages 1 to 12 years at risk for ASD quickly.
- The PDDBI Manual Supplement: Adolescent Normative Data extends the use of the product until age 18.5 years, allowing you to use the PDDBI to track response to intervention.
- The PDDBI Manual Supplement: Autism Spectrum Disorder Decision Tree (PDDBI ASD-DT) is designed to enhance the diagnostic power of the PDDBI Extended Form when used with individuals ages 1:6 to 12:5 years to provide a classification of the clinically relevant types of ASD as well as recommendations for further diagnostic assessment.
- The PDDBI Manual Supplement: Advanced Score, Multirater, and Progress Monitoring Interpretation e-Manual is a practical guide focusing on how to use and interpret the PDDBI for individual cases.
- The PDDBI Multirater Report highlights statistically significant differences between parent and teacher ratings to identify inconsistencies in behaviors across settings.
- The PDDBI Progress Monitoring Report identifies statistically significant treatment gains or worsening behaviors over time.

The PDDBI is Approved by TRICARE for ASD Treatment

The **PDDBI** is approved by **TRICARE** for use by ABA therapists in its Autism Care Demonstration (ACD) program. With easy-to-generate reports on PARiConnect, you can quickly determine any adjustments you may need to make in your treatment plans.
