

Make diagnosing and tracking progress easier

Whether you need to **screen, diagnose, or track individuals on the autism spectrum**, the PDD Behavior Inventory family of products has what you need. All four products have a Qualification Level B or S.

PDD Behavior Inventory

Developed to assess problem behaviors as well as appropriate social, language, and learning and memory skills in **individuals ages 1:6 to 18:5 years**.

PDDBI Manual Supplement: Autism Spectrum Disorder Decision Tree

Designed to enhance the diagnostic power of the PDDBI Extended Form when used with **individuals ages 1:6 to 12:5 years** to provide a classification of the clinically relevant types of ASD as well as recommendations for further diagnostic assessment.

PDD Behavior Inventory—Screening Version

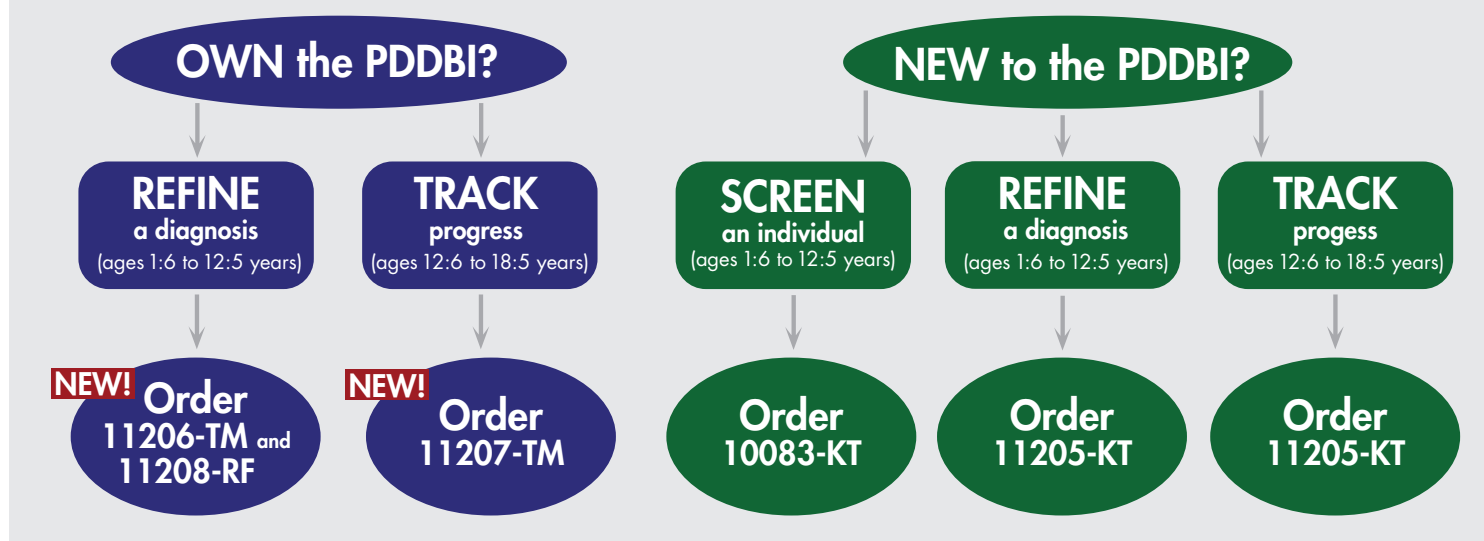

Produces one simple score that measures the presence of inappropriate social behaviors to identify **children ages 1 to 12 years** at risk for ASD quickly.

PDDBI Manual Supplement: Adolescent Normative Data

Extends the use of the product until **age 18.5 years**, allowing you to use the PDDBI to track response to intervention.

Which PDDBI Is Right for You?
