An objective, comprehensive test of intelligence

- Includes two supplemental speeded processing subtests (one verbal, one nonverbal).
- All eight subtests of the RIAS-2 can be completed in less than an hour, and the RIST-2 provides a *g* score in just 15 minutes.
- It can be used across the developmental continuum, from ages 3 to 94 years.
- It's affordable—about half the price of similar measures.
- Normative data are based on a sample of 2,154 individuals from 32 states representing 2012 U.S. Census proportions.
- Includes reliable change scores and ability-achievement discrepancies with the Academic Achievement Battery™ (AAB)™.
- **NEW!** The RIAS-2 Record Form with Spanish Responses includes Spanish-answer options for the Guess What, Verbal Reasoning, and What's Missing subtests.

Accuracy	Speed	Savings
A low emphasis on motor demand makes the RIAS-2 a more precise measure of general intelligence.	The RIAS-2 is faster to administer than similar measures—all eight subtests take less than an hour to administer and score. In addition, the available screening version, the RIST-2, can provide a <i>g</i> score in just 15 minutes.	The RIAS-2 is much more cost-effective than leading similar measures—less than half the cost of some competitors. In addition, this one test can be given throughout the life span, from ages 3 to 94 years, saving you from purchasing additional instruments.
The RIAS-2 also offers you updated item content; five indexes, including a new speeded processing index; and new normative data.	Both the RIAS-2 and the RIST-2 offer online scoring on PARiConnect, the industry's most reliable online assessment portal.	No other measure offers you the combination of accuracy, speed, and savings that you get with the RIAS-2!
