A standardized way to inform trauma follow-up and treatment

**TSCYC: Ages 3 to 12 years**
- Caretaker report measures 90 symptoms and includes eight clinical scales.
- Specific scales ascertain validity.
- PTSD worksheet evaluates PTSD criteria.
- Includes separate normative data for males and females in three age groups (ages 3–4 years, ages 5–9 years, and ages 10–12 years).
- Screening forms help determine treatment needs quickly.

**TSCC: Ages 8 to 16 years**
- Self-report carbonless form features 54 items and includes two validity scales, six clinical scales, and eight critical items.
- Alternate form (TSCC-A) makes no reference to sexual issues.
- Features separate normative data for males and females in two age groups (ages 8–12 years and ages 13–16 years).
- Screening forms help determine treatment needs quickly.

**Forms are also available in Spanish!**
