Age TSCC-SF: Ages 8–17 years;
TSCYC-SF: Caretakers of children ages 3–12 years

Format Paper and pencil; online administration and scoring via PARiConnect

Time 5 minutes to administer and score

Qual B or S

Screening forms help determine treatment needs quickly

- Derived from the TSCC and TSCYC, selected items were best at predicting overall trauma and sexual-related symptomatology.
- Provides a valid, reliable, and standardized means to screen child victims of trauma.
- Use as a first step to determine the need for follow-up testing and treatment.
- Includes two subscales (General Trauma and Sexual Concerns) that are scored separately.
- Available in Spanish to assist clinicians with bilingual and Spanish-speaking children and families.
- Supports the trauma informed care approach to treatment.
- Takes just 5 minutes to administer and score.
- Quickly indicates whether a child or youth is at risk for clinically significant psychological disturbance, making it useful for clinicians who see large numbers of children in short periods of time, such as in children’s advocacy centers.

Forms are also available in Spanish!
