Client Information

Name: Sample Client

Gender: Female

Age: 26

Test Date: (Not Specified)

Use of this Score Report requires a complete understanding of the *Clinical Assessment of Attention Deficit-Adult* (CAT-A) scales/clusters and its interpretation, applications, and limitations as presented in the CAT Professional Manual. This report contains raw and standardized scores from the CAT-A Answer Sheet. Users should refer to the CAT Professional Manual for procedures and guidelines for the interpretation of this report. Users also should refer to the Professional Manual for information about the psychometric characteristics of the CAT-A.

This report should be used as only one source of information about the individual being evaluated. In this respect, no decisions should be based solely on the information contained in this report. The raw and standardized scores contained in this report should be integrated with other sources of information when making decisions about this individual.

This report is confidential and is intended for use by qualified professionals who have sufficient knowledge of both psychometric testing and the CAT-A. *This report should not be released to the respondent or to any individuals who are not qualified to interpret the results.*
