

## Quick Note

by

P. Andrew Clifford, PhD, Kristi D. Roper, PhD, Daisha J. Cipher, PhD,  
and  
PAR Staff

### Patient Information

<b>Name:</b> Case Sample	<b>ID:</b> CS 12008
<b>Gender:</b> Male	<b>Age:</b> 90
<b>Race/Ethnicity:</b> Caucasian/White	<b>Marital Status:</b> Widowed
<b>Highest Level of Education Attained:</b> 8 <sup>th</sup> Grade	<b>Date of Birth:</b> (not specified)
<b>Date of Service:</b> 01/20/2007	<b>Examiner:</b> R Jacoby
<b>Type of Evaluation:</b> Preliminary	

This report is intended for use by individuals who are qualified and credentialed to interpret the GRRAS. These professional requirements, detailed in chapter 2 of the GRRAS Professional Manual, include, but are not limited to, having a working knowledge of geriatric rehabilitation psychology.

### GRRAS Score Summary Table

GRRAS Scale/Cluster	Raw score	Percentile	Clinical range of raw scores	Qualitative descriptor
<b>PRADLI</b>				
Total score	21	80	21 - 29	Moderate Clinical Range
<b>GMPI</b>				
Total score	87	63	83 - 107	Moderate Clinical Range
Pain and Suffering Cluster	21	71	20 - 27	Moderate Clinical Range
Life Interference Cluster	39	44	37 - 41	Subclinical Range
Emotional Distress Cluster	45	78	40 - 46	Moderate Clinical Range
<b>GLDS</b>				
Total score	157	98	> 101	Severe Clinical Range
Aggressive Agitation Cluster	79	97	> 35	Severe Clinical Range
Irrational Agitation Cluster	61	88	> 53	Severe Clinical Range
Dysfunctional Illness Behaviors Cluster	64	75	> 63	Severe Clinical Range

*Note.* The General Affected Group was selected by the user as the comparison population for establishing the percentile rank of the GRRAS scores.

## GRRAS Critical Item Summary Table

<b>PRADLI</b>	
<b>Score elevation</b>	<b>Raw score</b>
Item 1: Up-Time (UPT)	5
Item 7: Rehabilitation (REH)	1
Item 8: Recreation/Social (REC)	2

*Note.* On the PRADLI, a raw score of 7 on any given item indicates independent functioning, whereas a raw score of 1 indicates maximum assistance and, in many cases, noncompliance.

<b>GMPI</b>	
<b>Score elevation</b>	<b>Raw score</b>
Item 4: Moving About (AMB)	10
Item 5: Sitting (SIT)	6
Item 7: Out of Room-Activities (ACT)	3
Item 8: Activity Enjoyment (ENJ)	8

*Note.* On the GMPI, a raw score of 10 indicates the maximum level of pain/illness behaviors or dysfunction, whereas a raw score of 1 indicates mild pain/illness behaviors or no noticeable dysfunction.

<b>GLDS</b>	
<b>Score elevation</b>	<b>Raw score</b>
Item 6: Yelling (YEL)	6
Item 7: Verbal Aggression (VAG)	6
Item 8: Agitated/Hyperactive (AGT)	6
Item 9: Impulsive/Unsafe (IMP)	6
Item 11: Demanding/Complaining (DMG)	6
Item 13: Activity Level (ACT)	6
Item 14: Depressed/Withdrawn (DEP)	6
Item 15: Dysfunctional Illness/Pain (DIP)	6
Item 17: Anxious/Distressed (ANX)	6

*Note.* GLDS items appear in the GRRAS Critical Item Summary Table based on their intensity elevations. A raw score of 7 indicates immediate danger and a raw score of 0 indicates no evidence of the behavior.
