PARiConnect™

The psychological assessment industry's **leading online platform!**

PARiConnect

- ⊘ **No subscription fees!**
- ⊘ **No license fees!**
- ⊘ **No annual fees!**

Sign up to access these valuable features

Security/Technical

- **HIPAA Compliant**—Designed with strict adherence to HIPAA guidelines and is SOC 2 compliant.
- **Easy Access**—Simply log in to your account using any device with an internet connection. No apps to download or special hardware required.
- **Generate Email**—Easily email assessment links to clients and build customized email templates to save you time.

Reports and Data

- **Report Options**—With the click of a button, choose from score, interpretive, multirater, and progress monitoring reports, depending on the test you administered.
- **Free Retrieval**—View reports you have already run at any time for no extra cost.
- **Export Data**—Quickly export data to a spreadsheet if you need to do further analysis, share with your team, or compile for research. There are no additional fees.

Platform

- **No Fees**—No subscription fees! No license fees! No annual fees! No user fees! If a client does not complete an administration, cancel it and the inventory will be returned to your account.
- **Digital Library**—Stores your e-Stimulus Books and e-Manuals, saving you from transporting heavy materials. E-Manuals include handy searching and bookmarking features and can also be downloaded to one device to access offline.
- **Account Management**—Built-in features help you manage your client database, inventory, and clinicians in your practice. Upload clients in bulk, star your favorite assessments, and track and manage inventory. If a clinician leaves your practice, it's simple to archive the provider and transfer their clients to another clinician.

Training

- **Free Videos**—New clinicians, students, or researchers can get up to speed with easy-to-follow training videos.
- **Training Programs**—Share training with an entire class roster with no fees. Once the semester ends, you can archive the list for your records.

As healthcare becomes more complex, let PARiConnect make your life easier

SPEED
Enjoy the convenience of online administration with the speed of automated scoring.

SECURITY
All data on the platform is securely stored in compliance with HIPAA guidelines.

SELECTION
Delivers a variety of leading psychological assessment tools online including the **PAI, BRIEF2, TSCC, and more!**

FEATURES AND BENEFITS

- **Flexible Administration—**Choose to administer a test directly from your device, email a test link to your client, or key in responses directly from a paper and pencil administration. Many clinicians choose to streamline appointment time by having the client or parent complete a test while in the waiting room.

- **Inventory Control—**Purchase only the inventory you need. Our customizable features let you easily personalize, organize, track, and resupply your inventory. Whether you are giving a digital administration (i-Admin) or by pencil and paper, the platform will then offer reports available for that particular assessment. Alerts can tell you when your inventory is low and reports can be filtered to suit your needs.

- **Usage Report—**View how multiple clinicians are using inventory in a side-by-side format.

- **Manage Groups—**Easily organize and label your clients by creating groups.

- **Interactive Bell Curve—**This free tool can be used during feedback sessions to explain test results to clients and families. Students and trainees find it a useful learning tool. You can also input multiple scores and quickly assess results.
