DRF

Available with the
Digital Record Form!

A quick, reliable, and updated intelligence assessment.

The **Reynolds Intellectual Assessment Scales™, Second Edition, Normative Update** (RIAS-2 NU) provides a proven, efficient measure of general intelligence. Now strengthened by an updated normative sample based on 2023 U.S. Census data, it applies to a larger, more representative population. It offers clearer insight across the lifespan, reduced reliance on reading and motor skills, and digital scoring through PARiConnect.

RIAS-2 NU

PURPOSE Assess intelligence and its major components

AGE 3–94 years

FORMAT Paper and pencil; Digital Record Form; Online scoring via PARiConnect

TIME 20–25 minutes for intelligence assessment; 8–10 minutes for memory assessment; 8–10 minutes for speeded processing assessment

QUAL C

A valid and reliable instrument to fully assess or screen for intellectual functioning

DRF DIGITAL RECORD FORM

The DRF **modernizes the administration of performance-based tests** and streamlines the management of administration rules.

EASY TO LEARN

with free training materials on PAR Training

LOWERS THE RISK OF ERRORS

with embedded logic for basal, reverse, and discontinue rules

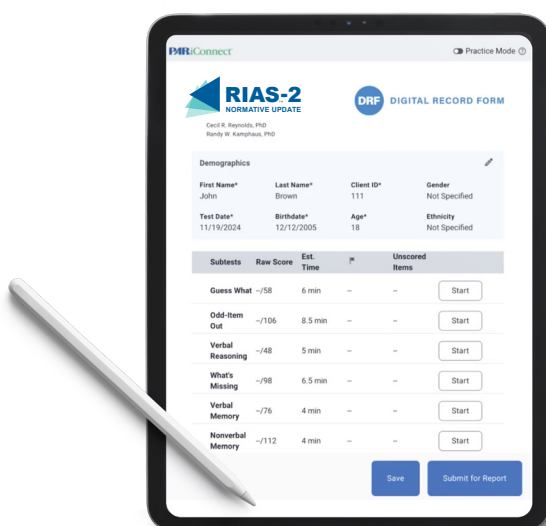

BUILT-IN FEATURES

allow you to add notes and flags for easy access later

Use the DRF on your tablet to capture item responses as you move through the different subtests.

Upon completion, the DRF tallies the raw score points for each subtest. Everything, including generating an interpretive or score report, is done in PARiConnect!

FEATURES AND BENEFITS

The RIAS-2 NU can be used as a stand-alone intellectual IQ assessment or as part of a larger battery to diagnose specific disorders, and now offers deeper insights with these new features.

RIAS-2 NU

- **Representative**—An updated normative sample based on 2023 U.S. Census data.
- **Accurate**—A low emphasis on motor demand makes the RIAS-2 a more precise measure of intelligence.
- **Faster**—All eight subtests take less than an hour to administer and score. In addition, the available screening version (RIST-2) takes just 15 minutes.
- **Wide Age Range**—One test spans the developmental continuum, from ages 3 to 94 years.
- **Modern**—New acceptable alternative responses for verbal subtests that reflect updated terminology.
- **Expanded**—The new Profile Variability Index (PVI) provides information on the variability of an individual's subtest performance in comparison to others in the same age group.

ALSO AVAILABLE

SPANISH

The RIAS-2 Record Form with Spanish Responses includes Spanish-answer options for the Guess What, Verbal Reasoning, and What's Missing subtests.

REMOTE

Remote administration allows you to administer using the Remote e-Stimulus Book via videoconferencing and Record Forms.

SCREENING

The Reynolds Intellectual Screening Test™, Second Edition, Normative Update (RIST-2 NU) is a quick and reliable measure of *g* to determine if more comprehensive assessment is needed. Now with updated normative data!
