

Broaden your reach

Test more clients with Spanish-language instruments.

Data projects that by 2050, one in three of your clients* will speak Spanish. You need assessment tools to reach this growing population but don't want to worry about the effects that interpreters, translation services, or referring to another practice can have on validity and standardization, let alone the added time and cost. Rely on **Spanish-language assessment tools** from PAR to reach more of your client base and reduce challenges with treating non-English speakers.

Use PAR's translated assessment tools with the 5 million school-age English-language learners.*

Not sure if you should assess in English or Spanish? Use the free LAM and find out

The **Language Acculturation Meter™** (LAM) provides a framework to guide testing and help you make informed assessment decisions, ensuring bilingual and English-language learner (ELL) examinees receive a fair and ecologically valid assessment. It measures:

- Education history
- Everyday English usage
- Self-reported English comprehension

From the PAI to the NEO, PAR offers nearly 50 instruments in non-English languages to help you test for issues such as autism, conduct disorders, cognitive functioning, social-emotional, personality, and trauma.

Administer online via PARiConnect

Rely on the convenience of digital administration in Spanish. Simply sign up for your free PARiConnect account to get started administering these tests:

- Assess impairment of executive function (EF) in children and adolescents with the Behavior Rating Inventory of Executive Function®, Second Edition (BRIEF®2) Parent and Self-Report Forms. Assess EF in adults who speak Spanish with the BRIEF®2A.
- Assess the current frequency and severity of disruptive behaviors in home and school with the Eyberg Child Behavior Inventory™ (ECBI™) and the Sutter-Eyberg Student Behavior Inventory-Revised™ (SESBI-R™).
- Assess, in Spanish, emotional disturbance from the parent and student perspectives with the Emotional Disturbance Decision Tree™ (EDDT™) and map results directly to IDEA criteria.
- Administer the gold-standard personality assessment to your Spanish-speaking clients with the PAI® Spanish: Revised Translation.
- Quickly screen to evaluate at-risk areas in the parent-child system with the Parenting Stress Index™, Fourth Edition Short Form (PSI™-4-SF).
- Evaluate acute and chronic posttraumatic symptomatology in adults with the Trauma Symptom Inventory™-2 (TSI™-2).
